SFF-8156

Specification for

54mm x 39mm SSD w/SATA Connector

Standardized as JEDEC MO-297A at Rev 1.1 dated March 27, 2009

This specification was submitted as a project to become a standard, and was Expired at that time.

| MO-297A  | JEDEC Slim Lite SSD Assembly | 8156 |

Abstract: This specification defines the 54mm x 39mm form factor and connector position for drives with the standard SATA connector. This form factor is targeted for, but not limited to, solid state drive (SSD) applications. The form factor is essentially a shortened 1.8" form factor with reduced area and the standard SATA connector located on the 54mm side. Mounting features are defined as mounting holes through the drive substrate that have a specific relationship to the connector mating interface and form factor. Variations include mounting options from either the front or back side of the drive substrate.

This specification was developed by the SFF Committee prior to it becoming the SFF TA (Technology Affiliate) TWG (Technical Working Group) of SNIA (Storage Networking Industry Association).
