Subject: Molex IP Disclosure Statement for SFF-TA-1026 Rev 2.0a

To Whom it may concern:

Based on the July 23, 2025 release of the SFF-TA-1026 Rev 2.0a specification, Molex believes it has several patents that may have essential claims. The patents include US Pat. Nos. 11,011,873; 11,527,854; and 11,811,168 and any foreign counterparts and related cases. This list may be updated from time to time in the event that Molex obtains additional relevant granted patents – for example Molex has a pending Chinese application 202510119123.5 which has not yet published and may result in one or more essential claims. Molex agrees that if any of the above referenced patents/applications (or any if Molex acquires any other relevant patents) include one or more issued claims that are deemed essential, Molex will grant a license to those essential claims on reasonable and non-discriminatory terms to companies requesting such a license. Please note that Molex reserves the right to increase the cost for a licensee that refuses to take a license and forces Molex to use legal action in order to enforce Molex's rights.

Sincerely,

Egide Murisa
Engineer, Industry Standards
