Subject: Molex IP Disclosure Statement for SFF-TA-1027 Rev 2.0

To Whom it may concern:

Molex hereby provides notice that Molex believes it has several patents that include one or more necessary claims directed toward features of the SFF-TA-1027 defined connector system. These patents include US Pat. Nos. 9,882,297; 10,122,106 and 10,403,993 as well as their respective foreign counterparts, directed toward the plug side. Molex hereby agrees that for any necessary claims of these patents (and/or any other patents Molex owns), Molex will grant a license on reasonable and non-discriminatory terms to companies requesting such a license. Please note that Molex reserves the right to increase the cost for a licensee that refuses to take a license and forces Molex to use legal action in order to enforce Molex's rights.

Sincerely,

Egide Murisa
Engineer, Industry Standards
